Consent Form for Holistic Treatment

The Animal Wellness Center combines traditional and alternative therapies for you animal companions. We focus on holistic health care to stimulate your pet's natural healing abilities. We offer a wide range of alternative therapies which may include acupuncture, veterinary chiropractic, homeopathy, herbal remedies, magnet therapy, nutritional and glandular therapies, and/or any other alternative treatments that Dr. Sanderson finds appropriate.

It is important you understand this form of treatment does not produce immediate results, yet sometimes they do occur and the results are spectacular. Sometimes the disease is too advanced, and nothing works in spite of our best efforts. Frequently your pet may experience a "healing crisis" where the symptoms actually get worse before they get better. Our goal is to make your pet healthy, comfortable and happy.

We thank you for the opportunity to treat you animal companion.

I have read and understand the type of treatments offered by Dr. Scott Sanderson and agree that this is what I want for my pet.
